1835-36

1835 & 1836.

ANNUAL CATALOGUE

OF

FRUIT AND ORNAMENTAL

TREES AND PLANTS,

CULTIVATED AT THE

LINNÆAN BOTANIC GARDEN AND NURSERIES.

WILLIAM PRINCE & SONS,

PROPRIETORS, FLUSHING, LONG-ISLAND, NEAR NEW-YORK.

Library, U. S. Department of Agriculture,
Washington, D. C.

"A wood coeval with himself he sees,
And loves his own contemporary trees."

Twenty-ninth Edition.

JAMAICA, L. I.

I. F. JONES & CO., PRINTERS.

1835.

PREFACE.

The Proprietors in tendering their new Catalogue with *reduced prices*, desire to state that their Fruit and Ornamental Trees, &c. are nearly all of *large size and vigorous growth*, and superior to any before offered to the public. The Establishment contains at the present period *more than a million of Trees and Plants*, and the Proprietors are willing to enter into arrangements of the most liberal description both as to prices and credit with all such persons as desire large quantities of Trees, &c. and with those proprietors of Nurseries who wish to extend their collections, and such other persons as may wish to establish *new Nurseries*, they will enter into arrangements *on terms which will allow ample time for advantageous reimbursement*. Any persons who are desirous to act as Agents in towns where no agency at present exists, will please to communicate their views in regard thereto.

The fruit trees in this catalogue are either grafted or inoculated, and are propagated from such European and American kinds as have acquired a well merited celebrity, the whole collection of which has recently undergone a most careful revision, and the selections have been made with great care and attention. Every precaution is taken which is necessary to preserve the different varieties completely distinct, and all the peach and other trees are perfectly healthy, and free from disease. Many persons, however, are apt to purchase trees without regard to any point but their cheapness, and not unfrequently, after the toil and expense of years, find them, when they arrive at bearing, absolutely worthless. Others who regard the price only, pay no attention to the size, and vigour of the trees, and consequently sacrifice many years uselessly before their orchards come into bearing. The strongest proofs the proprietors can give the public of their anxiety to guard against misconception, are the *precise descriptions* contained in the Treatises recently published, and other works of a similar character, in which they are now engaged; the result of which will be, that any person, however ignorant on the subject, cannot fail to know if he has been deceived.

In regard to the identity of the various kinds of fruits, the Proprietors do not pretend to a perfect infallibility, but *they do constantly aim at that point*, and therefore if an inadvertent error occasionally arise, it is because their unwearied scrutiny has not been able to guard against it.

One great advantage possessed by the trees sent from this establishment, is their particular *hardihood*. From the proximity of the nurseries to the ocean on one side, and to the East River on the other, with a free and open exposure to all winds, accompanied by the particular advantage of being so far north as to acclimatize the trees to any still more northern section of our country, they acquire a degree of hardihood which renders them extremely eligible for removal to colder latitudes, and to support the rigour of less favored regions, and trees thus hardened by nature are also found to succeed best in our southern states. It is doubtless to these causes that is to be attributed the general success which has attended the trees sent from this establishment, even when transmitted to Nova Scotia, the Canadas, &c. and the winter of 1831-32, incontestibly proved their superior hardihood, they having withstood the severity of that season uninjured, while immense numbers of trees elsewhere in the middle, and in the Eastern States, were destroyed thereby.

Specimen trees of every variety of fruit comprised in this catalogue, are now standing in the experimental orchards of the establishment, and all kinds are ready for sale. The stock of some of the newest sorts, however, is limited, and the trees, in consequence of their recent introduction are of less size. Many other varieties will be announced hereafter in a Supplementary Catalogue, additional time being necessary as well for their propagation as for judicious investigations. New fruits are not added to the collection, merely, because their names differ, but a selection is made of those only, which merit and have received the encomiums of persons acquainted with the subject.

A large number of the apples are the same as described by M. Coxe, and the Treatise on Fruits or Pomological Manual, published by the proprietors, contains descriptions of near 800 varieties of the different fruits.

It seems almost superfluous to remark, that the trees and plants in this catalogue not particularly designated as tender, are hardy.

Every tree, when sent from the garden, is duly labelled; and from fifteen to thirty trees are usually packed in each matted bundle.

Where trees are requested for exportation, they are carefully packed in mats, casks, or boxes, so as to be sent to Europe, the West Indies, or any part of America, with perfect safety, for which a reasonable charge is made.

All packages of trees are delivered at Fulton-market wharf, New York, by water, *free of freight*; and, when desired by persons at a distance, they will be shipped to any port they may designate, and agreements have been made with the lines of packets to Boston, Baltimore, Washington, Richmond, Charleston, Savannah, &c. to take bundles of trees at very moderate freights. If desired to be transmitted to Philadelphia, they can be sent there by the transportation line in one day, and the canals now forming in every section of our country, present cheap and easy modes of conveyance. No care is wanting on the part of the proprietors to give such directions as may cause them to arrive safely; but it is to be expressly understood, that after being thus delivered or shipped at New York, they are wholly at the risk of the person who orders them. Insurance against loss by sea will be effected whenever requested.

To such persons as desire fruit trees, &c. and are not themselves acquainted with the qualities of the different kinds, it is recommended that they specify in their orders the number of trees wanted of each species of fruit, and leave the selection to the proprietors, who will make it according to the views and tastes of the applicants; and in such cases they may rely that only those will be sent which are of the most approved kinds; and when desired, those that will ripen in succession, and larger trees can generally be selected in such cases. They can however if they prefer it, obtain all the necessary information by referring to the "*Treatise on Fruit*," &c.

It is also well, where the orders are small, to unite those of several neighbors in one, which will both abridge the trouble of execution and the expense of packing and transportation; and as each tree is labelled, it can cause no confusion.

Persons who may wish to make selections of fruits of *American* origin, will find them particularly designated. It sometimes occurs that the demands for particular kinds of fruit trees are so much greater than anticipated, that it renders those kinds for the moment comparatively scarce, except such as are of small size. In such cases, in order to prevent any delay it would be well that the orders should authorize, that such kinds may be replaced by others of equal quality, which trust will be executed in a manner worthy of the confidence reposed.

American Indigenous Trees, Shrubs, and Plants, or their seeds, suitable for sending to Europe, will be supplied in assortments from five to one thousand dollars or more, as enumerated in the catalogue, No. 4.

The proper seasons for transplanting trees, are the months of October, November, and December, in autumn; and March and April in the spring. For bulbous flower roots, the best season is from July to November inclusive. Greenhouse plants can be forwarded with safety at any season, except the winter months, and even then, if the conveyance is wholly by water.

In addition to these, Scions of Fruit Trees, Grape Vines, &c. can be transmitted from October to April. Many persons are prevented from ordering trees, from a supposition that they will not bear distant transportation, an idea so extremely erroneous, that it ought to be exploded; the proprietors are in the constant habit of sending trees, and even the most delicate plants, to the remotest parts of the Union with success, and they annually transmit large quantities to the different cities of Europe, where in some cases they have from 300 to 500 miles land carriage, after crossing the Atlantic. The success which attends these expeditions is an ample proof of the superior manner in which the articles are packed for their respective voyages; and persons sending orders, will please to state the extent of land and water carriage, and the articles will be packed accordingly. Precise directions should be given how the packages are to be marked, and by what route or conveyance they are to be forwarded, &c. The packages will be forwarded by such route as shall be designated, and where the option is left to us we will adopt such mode of transmission as shall be most economical and safe. During winter, when the northern rivers and canals are frozen, all packages destined for the Western

States, can be sent by the way of New Orleans, or via Philadelphia or Baltimore, to Pittsburgh or Wheeling.

Catalogues may be obtained *gratis* by direct application to us. All orders for Fruit and Ornamental Trees, Greenhouse Plants, Bulbous Flowers, Dahlias, or Seeds, must be sent *post paid direct to us, or through a regularly authorized agent, and not through the agency of any person who vends similar articles.* Every invoice transmitted by us will have a *printed heading and our signature, to prove it genuine, and we assume no guarantee whatever, where such an invoice cannot be produced.* We mention these cautions for good and conclusive reasons, knowing that we have been injured by deceptions, and we most particularly enjoin their strict observance on purchasers.

As many persons in the Union act as agents for different nursery establishments, it is particularly requested, that where orders are intended for us, it be plainly specified, but no person is to be considered as our Agent, unless he can produce written proof of the fact. It is expected that persons with whom no acquaintance exists, will, in forwarding orders otherwise than through an agent, designate some person in New-York who will be responsible for the payment, or tender a suitable reference. It is requested that those who, in sending orders, mention only the numbers by which the trees, &c. are enumerated in the catalogue, should be particular to state the *edition* from which they make their selections, as there are some numerical variations in the different editions. All letters requiring information will be promptly replied to, and the proprietors prefer that applications be made to them *direct* on every subject.

The postage of a letter is a trifling thing, but to one who receives a great number it becomes burdensome; persons are therefore desired to send their letters post paid.

Any packages intended for us must be left with *J. D. Maintain*, corner of South and Beekman streets New-York, but letters should always be transmitted per mail.

N. B. It is expected that no persons having similar establishments will copy the different remarks attached to this catalogue, without crediting the source; as it would be extremely unreasonable that other persons should take upon themselves the responsibility for any errors which may have been inadvertently advanced by the authors of this publication.

W. PRINCE & SONS.

PRICES OF TREES, &c.

The prices have been greatly reduced for a large number of articles; in many cases 25, 33 and even 50 per cent. below former rates, and the average prices throughout the catalogues will be found as low and in general much lower than the same articles, *equally genuine and of equal quality*, can be obtained elsewhere.

N. B. Where ornamental trees of very large size are wanted for streets, avenues, &c. or where fruits trees are wanted of extra size, they will be charged in proportion.

 For the Index, or table of Contents, see last page.

APPLES. Pommiers. Pyrus malus.

25 to 37½ cents each; \$18, \$20 to \$25 per 100, according to the kind and quality of the fruit, and the size of the trees.

TABLE FRUIT—Except where otherwise designated,

C denotes those which have proved good for cider also.

K those which are proper for cooking or preserving.

T and K those for both table and cooking.

1 Prince's yellow harvest, <i>for tarts and table, superior</i> , A	ripe in July	43 English golden reinette, <i>Princesse ne-ble</i> , C M	Oct. to Jan.

PEARS. *Poiriers. Pyrus communis.*

37½ to 50 cents each, according to the kind, and quality, of the fruit, and the size and rarity of the trees.

[The collection of Pears has been revised and scrutinized with the utmost care and attention to guard against error, and being a concentration of the most choice from every clime, is unrivalled in this or any other country. A large number of the kinds cultivated by different persons under the same names, will be found to differ essentially from the genuine fruits in this collection.]

M denotes melting, or juicy pears.

But denotes buttery pears.

C ——— breaking, or crisp do.

Bak ——— best for baking and preserving.

CHERRIES. *Cerisiers. Prunus Cerasus.*

50 cents each.

* denotes fruit of large size.

† ——— most esteemed for quality.

‡ ——— best for tarts, wine and preserves.

NOTE.—The two classes of Cherries are thus distinguished—G denotes those of the Kentish or Griotte family, the trees of which acquire a medium height, with compact and spherical heads, and will sustain a severe northern climate.—Those not noted belong to the Heart and Bigarreau families, the trees of lofty growth and pyramidal form.

Ornamental—50 cents, except those noted.	
159 Large double flowering, \$1	164 <i>Prunus pubescens</i> , or Dwarf snowy flowered
160 Dwarf double do. or double sloe, beautiful	165 insititia, or Bullace, P
161 Weeping, very curious, A	166 candicans, Hoary leaved
162 Variegated leaved, or striped leaved	167 depressa, Sand cherry
163 Sloe, or black thorn, of poetic celebrity, P	168 <i>lucialis</i> , Beach plum

Also, *Prunus maritima*, *pygmaea*, *pennsylvanica*, *susquehanna*, *canadense*, *sphaerocarpa*, and other American species.

The following Plums have been obtained from different sections of the Union, and as local names are often attached, many of them are probably synonymous with others before enumerated. They are now under cultivation in order to ascertain this point: and those who desire can be supplied with them at 50 cents each.

169 Fall copper	175 Newton's yellow gage
170 † Gwalsh ? Sept	176 long blue
171 D'amateur	177 Swisser
172 Large blue gage	178 Wetherill's large blue globe
173 Large long blue	179 Howland's gage Aug and Sept
174 Lex's plum	180 Schuyler's gage

NOTE.—The plum called Murray's Reine Claude in some catalogues is a synonym of No. 43, and that called Young's superior Egg, and Hick's large Egg, is a synonym of No. 108.

N. B. Trees of nearly all the kinds of Plums can be supplied suitable for dwarf or espaliers, if so required.

APRICOTS. *Abricotiers. Prunus armeniaca.*

Price 37½ cents each.

N. B. This fruit will succeed and produce plentifully in any locality where the Peach does, if the directions are followed which are stated in the Treatise published by the proprietors.

C denotes those for preserves.

N. B. Trees of the above kinds can be supplied suitable for dwarfs or espaliers.

PEACHES. *Pechers. Amygdalus persica.*

Price 25 and 31 to 37½ cents each—\$18,75 and \$20 to \$25 per hundred, according to the kind and quality of the fruit, and the size and rarity of the trees.

The following Peaches have been selected on account of their size, flavor, or time of ripening, from among the best kinds imported from Europe, as well as from such as have originated in America.

† denotes those of large size.

‡ ——— those of superior flavor.

C ——— clingstones or paves, and those not so designated are Freestone, or Melting peaches.

N. B. The names in italics are synonyms of those which precede them.

| 194 Mercator | | 210 Williamson's New York, C | Sept |

N. B. Trees of the different kinds can be supplied suitable for dwarfs or espaliers.

NECTARINES. *Brugnons. Amygdalus nectarina.*

37½ cents each—\$30 per hundred.

N. B. This fruit will succeed and produce well in any place where the peach does, if the directions are followed which are stated in the Treatise recently published; and as the varieties of this fruit are characterized by their beautiful transparent and waxen appearance, they may be ranked among the most admired appendages of the desert.

C denotes clingstones, or paves.

10 Caucasian woolly	<i>incana</i>

Fine new French and Italian Almonds—\$1 each, except those noted.

11 Aberame demi-amère	14 Farisienne, sweet
12 Amande á flotte, or á flots, sweet	15 New bitter fruited, 50 cents
13 Balotte, sweet	16 Small round hardshell, sweet 75 cents.

N. B. French sweet hardshell almonds, \$25 per hundred.

MULBERRIES. *Muriers*.

In consequence of the attention of our government, and of individuals, to the rearing of silk, and the culture of the Mulberry, great pains have been taken to introduce from France, Italy, and elsewhere, the kinds which have acquired most celebrity for this purpose; and of the success of those exertions, the following list will bear ample testimony.

S denotes those most used for silk worms.	Those marked * are 37½ cts.
T those for table fruit.	† are 50 cts.
O those that are for ornament.	‡ are 75 cts.

Those marked thus ¶ are \$1.

N. B. Where no price is named by the hundred, a discount of a third in price will be made when 50 to 100 are taken of one kind.

33 †Spring Grove		

N. B. When a hundred of one kind are taken, the price will be reduced one third. The genuine Antwerp varieties, No. 6 and 7, are very different from the inferior kinds often sold under the same names.

GOOSEBERRIES. *Groseillers epineux. Ribes Uva-crispa.*

Different good kinds mixed, 20 cents.

Fine kinds, by name, 25 cents.

Common do. do. 20 cents.

Largest select kinds, by name, 31½ cents.

Finest assorted kinds, by name, \$20 to \$25 per 100, according to size and rarity.

Common English kinds, by name, \$16 to \$18 per 100.

Of this fruit several hundred varieties have been imported from England, where they excel in its cultivation, especially in Lancashire and Yorkshire, and where the berries frequently weigh from one to one and a third ounces. The following have been selected on account of their large size, flavor, or time of ripening. About 50 other kinds have been sufficiently increased for sale, and can now be supplied.

Red.

- 1 Alcock's king
- 2 Alexander
- 3 Bang up
- 4 Bank of England
- 5 Barton's red
- 6 Beaumont's

N. B. Many other kinds have been imported that have not yet been increased, but will be inserted in a Supplement Catalogue.

GRAPES. *Vignes. Vitis vinifera.*

Those marked thus * 37½ cents each. † 50 cents each. ‡ 75 cents each.

Those not marked are \$1 each.

T denotes celebrated table grapes. W denotes celebrated wine grapes. L denotes those from the garden of the Luxembourg.

These prices are for single plants, or where a few vines only are wanted. Those who wish to establish vineyards, and consequently desire a large number, will be supplied at a great reduction.

For descriptions of the respective varieties, and directions for their culture, see "Prince's Treatise on the Vine."

The synonyms are carefully arranged, and in no case is the same fruit knowingly twice enumerated in this list, and where a doubt exists, it is so stated. Several hundred foreign varieties can be supplied that are not here enumerated, but which will be found in the Treatise on the Vine, and in former Catalogues.

- 1 † July grape, T
- 2 † Early white muscadine, T
- 3 † White sweet water, T
- 4 * Black sweet water, T
- 5 † Striped Aleppo, T
- 6 † Esperione, T

| 68 †Auvernat rouge clair, \$6 per do | 73 †White sauvignon, L |

Madeira Grapes.

All of which are celebrated for wine.

- | | |
|---|--|
| 74 Maroto Preto | 78 †Herbemont's Madeira, or <i>Warrenton</i> |
| 75 †Tinta, <i>Negra-mol</i> , or <i>Violet</i> , or <i>blue Madeira</i> , per dozen \$8 | \$4½ per dozen |
| 76 Verdelho, or <i>Verdilhio</i> | 79 Bual |
| 77 Negrinho, \$8 per dozen | 80 Muscatel |

German and Swiss Grapes.

These are principally celebrated wine grapes; and I have information from the highest sources, that those numbered 82, 92, 94, 96, 97, 98, 101, 102, and 103, are considered among the most valuable for vineyards, on account of their abundant and regular crops, and their resisting the severest winters uninjured. In addition to these here enumerated, a number of varieties of grapes are cultivated in Germany which are necessarily arranged under other heads in this catalogue, including the principal part of the Burgundy grapes; and I am assured by a gentleman who has a very extensive vineyard on the Rhine, that the grapes numbered 1, 5, 65, 66, 67, 68, 69, 71 and 72, support there all the rigors of the climate, and produce immense and regular crops.

- | | | |
|--|--|--|
| 81 †Blue cartager, T | 95 Red Swiss, W | |
| 82 †Facun, <i>white, very celebrated for wine and abundant crops</i> , L | 96 †Riessling, <i>Clairette de Limoux</i> , L \$6 per dozen | |

284 †Gimbrede's Bald eagle, large blue	

N. B. Many new American varieties are under cultivation, including a large number of seedling varieties, originated by the proprietors from admixture of pollen. These will be for sale soon, when an extra catalogue of them will be published.

Grape Vines in quantity.

Fine varieties for wine, *assorted by the proprietors*, 20 to 25 dollars per 100.

Fine varieties for the table, *assorted by the proprietors*, 25 dollars per 100.

Do do of the more rare varieties, 40 dollars per 100.

Common French varieties, *such as are usually sent out in mass from their vineyards*, 12 to 15 dollars per 100.

SCIONS, &c.

Scions of Grapes of a number of kinds can be supplied, if applied for in season, at from 5 to 12 dollars per 100, or in less quantities; but in no case will scions of any variety be sent to a less amount than the price of a vine; and of the very rare varieties, three scions will be considered equivalent in value to a vine. Scions of several kinds of Grapes, 15 to 25 dollars per thousand.

Scions of all kinds of Fruit trees, suitable for ingrafting, will be supplied at 50 cents per dozen, where the price of a tree does not exceed that sum; but where it does, the same price will be charged for the dozen scions as for a tree of the same kind; and in no case can a charge of less than the price of a tree be made for grafts of any variety, however few may be desired. When a large number of scions are wanted of the more common sorts of Fruits, they will be supplied by the 100 or 1000 at reduced rates. It is better that such orders be sent in the fall or winter.

Scions of Currants, Gooseberries, Raspberries, Berberries, Mulberries, Quinces, Figs, Poplars, Willows, &c. will be supplied at prices in proportion to their respective value; but no charge is made of a less sum, than the price of a plant of the same kind.

Scions of the five species of Osiers, or Willows, most celebrated for basket-making can be supplied, suitable for planting hedge-rows, at from 3 to \$5 per 100, or \$25 per 1000.

Hawthorns for hedges, of the celebrated Washington Thorn, at 75 cts. per 100, or \$5 per 1000.

Do do extra large, 6 to \$8 per 1000.

English hawthorn quicks, 75 cts. per 100, and 4 to \$5 per 1000.

Do do extra large and strong, 6 to \$8 per 1000.

Buckthorn, or Rhamnus catharticus, for hedges, \$2 to \$3 per 100.

Do larger size, \$6 per 100.

Yellow Locust, small trees for hedges, at from 5 to \$8 per 100.

Osage Orange, or Maclura, for hedges, \$40 per 100.

Chinese arbor vitæ, small, for hedges, 15 to \$20 per 100
 Privet, or prim, for hedges, \$12 per 100.
 Scions of do. \$4 per 100, and \$25 per 1000.
 Honey Locust, or Three thorned Acacia, (part thornless,) 5 to \$10 per 1000.
 Red Cedar, for hedges, \$12 per 100, or \$80 per 1000.

ESCULENT ROOTS, &c.

Asparagus, Common, per 100, 50 to 60 cents, and per 1000, \$5½
 Large Dutch, per 100, 75 cents. to \$1; per 1000, 6½ to \$7½ according to the age.
 Artichoke, Jerusalem, per dozen, 50 cents; per 100, \$3.
 Green globe, per dozen, \$2½; per 100, \$15.
 Cardoon, per dozen, \$2½; per 100 \$15.
 Chamomile, double, each 25 cents; per dozen, \$1½; per 100, \$8.
 Horse radish, per dozen, \$1½; per 100, \$5.
 Dyer's Madder, each 25 cents; per dozen, \$2½; per 100, \$10.
 Licorice, each 50 cents; per dozen, \$5.
 Hop Roots, per dozen \$1; per 100, \$5; per 1000 \$30.
 Sea Kale, per dozen, \$2; per 100, \$12.
 Rhubarb for Tarts, or Pie Plant, each 12 to 25 cents, according to age; per dozen, 1½ to 2½ dollars; per 100, 10 to \$18.
 Common, or Rhapontic, each 50 cents; per dozen, \$4.50.
 Palmated officinal, each 50 cents; per dozen, \$5.
 Thick leaved, each 50 cents; per dozen, \$5.
 True Medicinal, or Rheum australe, each 75 cents; per dozen, \$6
 Wilmot's early red, each 50 cents; per dozen, \$4½.
 Goliah, each 50 cents.

FIGS. *Figuiers. Ficus carica.*

The culture of this delicious fruit having recently become an object of particular attention, and requiring no more care to covering in winter than the delicate kinds of grapes, the greatest pains have been taken to extend the collection by importations of the choicest kinds from the south of France, Italy, and elsewhere; and it now forms a concentration of this fruit, unrivalled in extent and excellence.

Those marked thus * 50 cents. †75 cents. Those not marked are \$1. By the hundred a discount of one third in price will be made.

D denotes those described in Duhamel.

N. B. See greenhouse catalogue for other varieties.

ORANGES, LEMONS, CITRONS, SHADDOCKS AND LIMES.

These require sufficient protection in winter to keep them from freezing, in the states north of South Carolina: in the latter state and those south of it, they do not require it. In Italy, extensive nurseries of these fruits are cultivated, some of which contain 200 varieties. A work has recently been published at Paris, edited by Messrs. Risso and Poiteau, which contains engravings and descriptions of 160 varieties, comprising the most valuable and interesting. It is from an inspection of those figured in this work that the new varieties have been selected which are here enumerated; to obtain which has been attended with great difficulties. About 40 new varieties, not here enumerated, will be ready for sale in September 1835, when an extra catalogue of them will be furnished.

Those marked thus *, of 1 year's growth from inoculation, \$2

2	do	do	do	3
3	do	do	do	3 50

Those marked thus † are \$3,50 each. Some of these kinds are of three. and others but of one and two years growth.

Those marked thus † will be each \$5, and being quite new, are not at present large.

Above 30 other beautiful species can be supplied, comprising all that are particularly interesting, a part of which are enumerated in Catalogue No. 4, of American Trees and Plants.

ROSES. *Rosiers. Rosa.*

This favorite flower has been cultivated to such an extent in Europe, that it combines almost every tint of which nature is susceptible, and some of their collections contain above 1400 superb varieties. The following have been selected on account of their fragrance, size, beauty, singularity, or delicacy, and the original plants of many of these kinds cost from \$1 50 cents to \$4 75 cents each, exclusive of the expenses and losses attending importation. The collection occupies an acre of ground, where all the kinds are marked with their respective names, and during the period of their bloom they present an accumulation of varied beauties scarcely to be rivalled, and those who may desire it, can make their selections when in flower. The various kinds of roses present, also, a great diversity in respect to size as well as other points, some being naturally of very tall stature, others of medium height, and others quite diminutive. All the following Roses will endure the winters of any part of the Union without protection, with the exception of a few of the China roses. The culture of roses is of the most simple and easy description, and information on that point will be found in the *Treatise* recently published. The different kinds of Roses have been critically examined when in flower, and the remarks as to their qualities are the result of the personal observation of the proprietors.

These Roses are almost wholly on their own bottoms, a few of the most rare kinds only being inoculated, and the prices are lower than ever before offered to the public. Where a dozen plants are ordered a discount of 25 per cent will be made—where fifty are ordered 30 per cent, and to such Nurseries as purchase an assortment of a hundred or more to revend, consisting of two or more of a kind, 40 per cent, and where two hundred or more are taken of those most plenty, and similarly selected, 50 per cent.

Those marked thus * are 25 cents each. † are 37½ cents each. ‡ are 50 cents each. Those marked thus ¶ are 75 cents each. Those not marked are \$1 each.

The first section of Roses, extending to No. 529, is comprised of Double Roses only, and is a selection, comprising such only as are beautiful and interesting.

China Roses.

Most of which are monthly, or ever-blooming.

The monthly varieties, when planted in the open ground, are particularly interesting, on account of expanding their flowers in March and April, when those of other kinds have not yet made their appearance. They continue to bloom throughout the summer; and in the autumnal months their numerous flowers also afford particular gratification, as nature then seems most to need their cheering influence.—Nearly the whole number support our winters with little or no protection, as designated by this mark †: those most tender need only to have a box or barrel placed over them during winter. Where any kinds are designated as climbers, it is meant that they grow tall, and are suitable for training, &c.

		\$	cts.

Note. All the Champney and Noisette varieties are climbers, or proper to be trained. The Rose No. 548 has been trained to the height of 20 feet, and Nos. 553, 555, 566 will also serve for climbers.

Tree Roses.

These are budded on strong stocks 3 to 4 feet from the ground and form fine heads. They present the appearance of Trees in miniature and bloom profusely. Above 50 varieties can be supplied, comprising many kinds of Chinese Monthly, Noisette Monthly, Damask Monthly, or Four Seasons, and superior sorts of Provence Roses, &c., prices from \$1.50 to \$2 each.

N. B. Twenty-five other Chinese varieties are now under culture, and will be enumerated in the next Catalogue.

CHINA ROSES, &c. above enumerated, in assortments—the selections to be made by the proprietors, or principally so.

100 varieties, including the most rare,	for \$60
100 do, equally beautiful, but some less rare	for 50
50 do. do. assorted,	for 35
50 do. do. less rare	for 25
25 do. do. assorted, including many of the most rare	for 20
25 secondary do.	for 16

ROSES IN ASSORTMENTS.

Selected from all except the China Roses—the selections to be made by the proprietors

third do. do. of 100 good kinds	35
The first assortment of 50 roses of 50 very fine kinds	35
second do. do. of 50 fine kinds	28
third do. do. of 50 good kinds	20

Where the whole collection of roses is taken, or where a large number is wanted, a liberal discount will be made.

N. B. About one hundred other kinds of Roses are under cultivation, which will be mentioned in the next Catalogue.

PÆONIES. *Pivoines.*

No class of flowers has recently attracted more attention in Europe than this, a monograph of which has lately been published in London. Every variety will support the winters of the United States and Canada. Most of the varieties are extremely splendid, and others possess striking peculiarities. Anticipating that a similar taste would be evinced in this country, the proprietors have, by great exertion, obtained every variety possible.

1 Sabine's crimson officinal	<i>Pæonia officinalis, sabini</i>	\$1 00

Do.	35	do.	do.	50
Do.	40	do.	do.	70

N. B. The selection of the above assortments must be mostly left to the proprietors.

CARNATIONS. *Oiellots doubles. Dianthus caryophyllus.*

This most interesting class of flowers, which so deservedly commands universal admiration, has received particular attention, and the entire collection now comprises about 200 superb varieties—the most of which have been considerably increased, and the others are in a course of propagation. It may be well to remark, that sometimes a branch, or even a whole plant, may vary the color of its flowers; but this is not very frequently the case.

Those marked thus * are 37½ cents each. † are 50 cents each. ‡ are 75 cents each. Those not marked are \$1 each. ¶ denotes those whose flowers are rose leaved.

CHINESE CHRYSANTHEMUMS.

Chrysanthemum sinense.

This superb flower (often denominated *Artemisia*) is deservedly esteemed; being perfectly hardy, and affording a most brilliant display, at a time when the chilling blasts of autumn have left us but the vestiges of departed verdure. It is therefore a subject of much gratification, that the number obtained from China exceeds 60 varieties, nearly the whole of which are offered to the public in this catalogue.

The following are 25 to 35 cents each.

- | | |
|--|---------------------------|
| 1 White quilled | 14 Paper white |
| 2 Buff, or orange, changeable, red and orange flowers often on the same plant | 15 Quilled flame yellow |
| 4 Purple | 16 Sulphur do |
| 5 Lilac quilled | 17 Superb clustered do |
| 6 Rose colored, or pink | 18 Small yellow |
| 7 White and lilac, changeable; the flowers vary to lilac, to white with a purple centre, and to pure white | 20 Quilled pink |
| 8 Spanish brown | 21 Semi-double do do |
| 9 Straw colored quilled | 22 Large quilled orange |
| 10 Golden yellow | 23 Semi-double quilled do |
| 11 Tasselled white | 24 Early crimson |
| 12 Superb do | 25 Curled lilac |
| 13 Semidouble quilled white | 26 Quilled light purple |
| | 27 Expanded light purple |
| | 28 Quilled yellow |

The following kinds are 37 to 50 cents each.

- | | |
|-----------------------------------|------------------------------------|
| 29 Double Indian yellow, superb | 37 Quilled salmon, 37 cts |
| 30 Double Indian white, superb | 38 Semi-double quilled pale orange |
| 31 Brown purple, 37 cts | 39 Two colored red |
| 32 Early blush, 37 cts | 40 Curled buff, or salmon, 37 cts |
| 33 Golden lotus, 37 cts | 41 Large lilac, 37 cts |
| 34 Quilled purple | 42 Late pale purple |
| 35 Starry purple | 43 Two colored incurved |
| 36 Park's small yellow, beautiful | 44 Blush ranunculus |

The following are 50 to 75 cents each.

- | | |
|-------------------------------|---|
| 45 Late quilled purple | 53 Sabine's, \$1 |
| 46 Tasselled lilac | 54 Pale buff |
| 47 Tasselled yellow | 55 Changeable pale buff |
| 48 Yellow waratah, 37 cts | 56 Purple ranunculus, \$1 |
| 49 Pale lilac | 57 Crimson daisy flowered, small and beautiful, blooming in profuse clusters. |
| 50 Large buff, superb, 50 cts | |
| 51 Barclay's | |
| 52 Aiton's yellow | |
- } these are \$1 each

IRIS, or *Fleur de Lis*.

This flower, from its great combination of colors, (whence it derives its title,) and altogether unique appearance, has ever found admirers among the curious and the scientific. It is also the court flower, or emblem, of the Bourbons. In addition to these here enumerated, there are about 50 beautiful bulbous varieties, for which see catalogue of bulbous flowers.

25 cents each, except those noted.

1 Large blue German	<i>Iris germanica</i>

N. B. Many other medicinal plants will be found enumerated in Catalogue No. 4.

DAHLIAS.

THE new Catalogue of this magnificent Flower is now ready for distribution, comprising all the new varieties, many of which are superbly striped and variegated. Those who desire assortments will be supplied at lower rates than they can be obtained elsewhere, and 10,000 roots are now ready for delivery, comprising above 500 varieties, of which a specimen bed containing an acre is annually formed for the inspection of visitors. The collection is the most extensive in America, and for particular details and descriptions, as well as directions for their culture, see Catalogue of them.

Superb double varieties, each 75 cents

Double varieties of kinds less rare, each 25 to 50 cents

Some very superior new kinds, each \$1 and upwards, as per Catalogue

Do Do Do \$8 to \$10 per dozen

Fine assorted kinds, per dozen, each a distinct named variety, \$6

Do Do per dozen, each a distinct named variety, but of kinds less rare,
\$4 50.

Do Do Do Do of kinds more common, \$3
Mixed Double kinds, \$2 25 per dozen

CAMELLIA JAPONICA, or *Japan Rose*, &c.

THE collection of Camellias comprises all the newest varieties, most of which are very remarkable for their splendor. The prices are now greatly reduced, in consequence of the plants being much increased. Owing to the universal admiration which this plant has received, and its requiring so little care, and enduring without injury a great degree of cold, the demand has been unexampled. The proprietors have at all times very large quantities to supply wholesale orders, on which a liberal discount will be made, and their present collection exceeds 3000 plants, which they are rapidly increasing.

The collection of Geraniums has also been enriched by the addition of above a hundred new varieties, whose flowers are remarkable for their size and splendid coloring, comprising the very *élite* of this class of plants.

For a complete list of the different varieties, with the low prices at which these and other Greenhouse plants are now offered, see Greenhouse Catalogue, No. 3.

SELECTION OF FRUITS.

THE following selections of fruits of kinds best known, are well calculated for a garden and orchard, where only a limited number is required, and it may aid those who are not acquainted with the subject. The numbers refer to the enumeration in the catalogue.

APPLES—*Forty varieties.*

1	4	11	13	19	23	26	29	36	42	47	51	53	54	59	63	64	66

CONCLUSION.

Strangers who may wish to visit the Garden at the period at which particular flowers may be seen in perfection, are informed, that the Hyacinths are in their greatest

beauty from the 1st to the 25th of April—Tulips from the 1st to the 18th of May—Roses from the 1st to the 15th of June—Pæonies from the 10th to the 30th of May—Carnation Pinks from the 1st to the 15th of July—Dahlias from June to October; but among such a multitude of Plants from every region, there is at all times a great variety in flower, which are calculated to interest both the botanist and the amateur.

All Proprietors of Nurseries and Venders of Seeds, &c., are invited to visit and inspect our Establishment.
